THIS CASE HAS BEEN REFERRED TO THE DISTRICT ATTORNEY'S OFFICE FOR REVIEW. THE 19C INVESTIGATOR IS AVAILABLE TO PROVIDE ASSISTANCE TO LAW ENFORCEMENT. PROTECTIVE SERVICES WILL BE PROVIDED WHEN NECESSARY.

WHEN NECESSARY, PROTECTIVE SERVICES MUST BE PROVIDED. THE 19C INVESTIGATION SHOULD PROCEED UNLESS OTHERWISE DIRECTED BY THE DISTRICT ATTORNEY'S OFFICE.

**SPDU ACTION**

TPR. GRANT REPORTS REVIEWING THIS CASE ON 12/29/05. AT THIS TIME TPR. GRANT FORWARDED A COPY TO THE BRISTOL COUNTY DA'S OFFICE FOR THEIR REVIEW.

**ALLEGATION**

REPORTER RECEIVED A 3 PAGE LETTER FROM [REDACTED] HIGHLIGHTING CONCERNS AT ALV'S PROGRAM. ALV ATTENDS THE RESIDENTIAL PROGRAM/DAY PROGRAM FULL TIME AND GOES HOME FOR WEEKEND VISITS.

IN SEPTEMBER 2005, ALV WAS IN A CATATONIC STATE FOR UP TO 30 MINUTES. ALABS COULD NOT ACCOUNT FOR THE EPISODE. REPORTER STATES AN INCIDENT REPORT WAS FILED AT THAT TIME.

ALV WENT HOME IN OCTOBER 2005 AND WAS NOT ABLE TO IDENTIFY FAMILY MEMBERS. [REDACTED] HAD BEEN NOTICING THAT HE IS NOT FUNCTIONING AT THE SAME LEVEL. ALV HAD ALSO BECOME FORGETFUL. ALV HAD TROUBLE DRESSING AND ONCE PUT HIS PANTS ON BACKWARDS. ON ANOTHER OCCASION, ALV WAS GIVEN AN APPLE AND DIDN'T KNOW WHAT TO DO WITH IT. WHEN [REDACTED] GAVE HIM A TOWEL TO WASH THE APPLE, HE BEGAN WIPING THE TABLE. ALV WAS DISORIENTED.

DURING THE RECENT HOLIDAY HOME VISIT, ALV WAS ABLE TO IDENTIFY FAMILY MEMBERS AGAIN AND SEEMED MORE VERBAL/SOCIAL. WHEN IT WAS TIME FOR ALV TO GO BACK TO THE PROGRAM, HE BEGAN DISCLOSING THE INCIDENTS AND EXPRESSING FEAR OF THE ALABS AND FEAR OF BEING KILLED.

ALV DISCLOSED THAT HE IS BEING RESTRAINED AND SHOCKED IN A CHAIR. ALV REPORTS LIGHTEADEDNESS, FEELING LIKE HE IS GOING TO HAVE A HEART ATTACK WHILE BEING SHOCKED. STAFF ALSO TIGHTEN THE RESTRAINTS ON HIS WRISTS SO TIGHT, THAT HE BECOMES LIGHTEADED. ALABS REFUSE TO LOOSEN THEM WHEN ALV REQUESTS.

ALV HAS A LEVEL 2 BEHAVIOR PLAN WHICH ALLOWS RESTRAINTS BUT DOES NOT HAVE A LEVEL THREE WHICH AUTHORIZES SHOCKS TO ADDRESS BEHAVIORS.

ALV'S SERVICE COORDINATOR WAS NOTIFIED.

REPORTER STILL HAS NOT RECEIVED A CURRENT LIST OF STAFF MEMBERS THAT ARE ALLOWED TO RESTRAIN INDIVIDUALS THAT WAS REQUESTED IN OCTOBER 2005. REPORTER WAS ONLY PROVIDED WITH A LIST OF ADMINISTRATORS THAT MAY AUTHORIZE THOSE RESTRAINTS.

ALV WAS RETURNED TO THE CENTER BY [REDACTED]

**ALLEGATION**

DPPC RECEIVED A 9 PAGE FAX FROM THE REPORTER FOLLOWED BY A CALL ON THE HOTLINE REGARDING THE FOLLOWING ALLEGATIONS REGARDING THE JUDGE ROTENBERG CENTER

THE ALV, [REDACTED] THIS ALV RECEIVED BURNS ON BOTH ARMS AND LEGS FROM THE LEVEL 4 GED SHOCK. THE ALV ALSO SUSTAINED BURNS TO THE ALV'S TORSO. THE NURSING STAFF WOULD HAVE TO REMOVE THE ALV FROM THE GED DEVICE FOR 4- 6 WEEKS WHILE THE BURNS WOULD HEAL. WHEN THE ALV WAS OFF THE GED DEVICE THE ALV'S HEAD BANGING BEHAVIORS DECREASED. THIS ALV ALSO SUSTAINED A BROKEN ELBOW IN JANUARY OF 2005. THE ALV WAS [REDACTED] AND TAKEN TO THE DOCTOR, [REDACTED] OF SULLIVIAN ORTHOPEDICS. [REDACTED] INDICATED THAT [REDACTED] THE ALV REQUIRED [REDACTED] IMMEDIATELY. THE REPORTER SPOKE WITH NURSING. THE NURSING STAFF NEVER ARRANGED FOR THE ALV TO HAVE [REDACTED] THE ALV HAD ANOTHER APPOINTMENT [REDACTED] THE DAY BEFORE THE APPOINTMENT, THE ALV WAS TAKEN TO [REDACTED] ANOTHER DOCTOR WAS FOUND AS THE ALAB DID NOT WANT THE ALV TO GO BACK TO [REDACTED] BECAUSE [REDACTED] WOULD HAVE KNOWN THAT THE ALV NEVER RECEIVED [REDACTED] IN A PROMPT MANNER AND COULD HAVE SOME PERMANENT DAMAGE DUE TO THAT FAILURE.

**ALLEGATION**

THE REPORTER WAS [REDACTED] THE AL V'S CLASSROOM ON 7/21/06. DURING THAT TIME, THE REPORTER WITNESSED ROUTINE GED ROTATION ON THE AL V, AND NOTED AN INJURY TO HIS CALF, WHICH APPEARED TO BE AN INCH LONG SCRATCH MARK.

WHEN THE REPORTER VIEWED THIS INJURY WITH [REDACTED] [REDACTED] INDICATED THAT THE MARK MOSTLY LIKELY WAS FROM THE AL V'S SKIN BEING CAUGHT IN THE BUCKLE ON THE STRAP OF THE GED DEVICE.

THE REPORTER PHOTOGRAPHED THE INJURY TO THE AL V'S RIGHT CALF ON 7/27/06, NOTING THAT THE LENGTH OF THE MARK AT ITS LONGEST POINT WAS APPROXIMATELY THE SAME AS THE LENGTH OF THE BUCKLE, ABOUT AN INCH.

**CRIMINAL ACTIVITY STATEMENT**

**THIS REPORT HAS NOT BEEN SENT TO THE DISTRICT ATTORNEY. IF ANY INDICATION OF CRIMINAL ACTIVITY IS DISCOVERED CONTACT THE STATE POLICE DETECTIVE UNIT. CALL: (617) 727-6465**

**SPDU ACTION**

IN THE PAST, DLT NAGLE HAS SPOKEN TO [REDACTED] AS A RESULT, SPDU VISITED JRC, RESULTING IN NO EVIDENCE OF A CRIME & TECHNIQUES THEY (JRC) APPLY ARE EXPLAINED AS A 'COURT APPROVED' - AVERSION THERAPY TECHNIQUES.

**ALLEGATION**

ON 5/16/07 REPORTER WAS SENT A COPY OF AN AFFIDAVIT OF [REDACTED] FROM JUDGE ROTENBERG CENTER (JRC), [REDACTED] THE AFFIDAVIT WAS DATED 4/26/07; IT HAD BEEN FORWARDED TO DPPC FROM A STATE HOUSE EMPLOYEE.

[REDACTED] INDICATED THAT HE WORKED AT JRC FROM [REDACTED] 2003 UNTIL MARCH 2006, AND THAT HE WANTED TO SHARE HIS MEMORIES OF STUDENTS AT JRC SHOWING SIGNS OF STRESS. HE INDICATED THAT SOME STUDENTS HE WORKED WITH RECEIVED 20-30 GED APPLICATIONS A DAY, AND SOME 3-10 A DAY. HE INDICATED THAT IT WAS COMMON FOR OTHER A STUDENT WHO WAS ABOUT TO SEE ANOTHER STUDENT GET A GED TO THINK THAT THE GED MIGHT BE INTENDED FOR THEM. HE STATED THAT IN RESPONSE TO THIS STUDENTS WOULD OFTEN SCREAM, GET OUT OF THEIR SEATS, OR ATTEMPT TO REMOVE THEIR ELECTRODES. HE RECALLED BEING TOLD BY [REDACTED] TO ANNOUNCE THAT HE WAS GETTING A PENCIL EVERY TIME HE REACHED FOR HIS POCKET, AS THIS WOULD REDUCE STUDENT STRESS WHEN HE REACHED FOR THE POCKET OF HIS APRON, ON WHICH ALSO HUNG THE REMOTE CONTROL DEVICES FOR THE STUDENTS' GEDs. [REDACTED] DESCRIBED THAT AT TIMES THE BEHAVIORS THAT STUDENTS HAD IN REACTION TO THE REACHING FOR A REMOTE WERE BEHAVIORS THAT WERE TREATED WITH GED WHEN THEY OCCURRED, SO THAT HE OR [REDACTED] HAD TO GIVE GEDs FOR THEM. HE STATED THAT THERE WERE NO EXCEPTIONS, A SCREAM WAS A SCREAM, A GRAB WAS A GRAB AND THEY HAD TO FOLLOW COURT-APPROVED ORDERS. HE STATED THAT THIS WAS SUCH A TYPICAL OCCURRENCE THAT IT WAS HARD TO RECALL ONE INCIDENT STANDING OUT (THOUGH HE NOTED [REDACTED] WOULD SAY "NO, NO, NO" OR EXHIBIT A SINGING VOICE IN ANTICIPATION [REDACTED] SPOKE QUICKLY IN SPANISH [REDACTED] WOULD SPEAK IN HIGH-PITCHED FALSETTO AND JUMP OUT OF HIS SEAT EVEN IF TOLD IT WAS NOT FOR HIM, [REDACTED] WOULD TENSE UP). [REDACTED] ALSO SAID THAT [REDACTED] WOULD MOAN SHORTLY AFTER GETTING A GED, THAT [REDACTED] WOULD SHED LARGE AND SLOW TEARS AFTER GETTING A GED. ANOTHER STRATEGY EMPLOYED BY STAFF WAS TO GIVE POSITIVE FEEDBACK TO THE STUDENTS WHO WERE NOT RECEIVING THE GED, AND SOME STUDENTS REACTED LESS SEVERELY WHEN THIS HAPPENED, HOWEVER, HE STATES THAT ALL STUDENTS SEEMED TO REACT IN SOME WAY WHEN WATCHING OR HEARING OTHER STUDENTS GET GEDs.

[REDACTED] INDICATED THAT IN THE FALL OF 2004, [REDACTED] WAS FEARFUL WHEN STAFF PASSED THE REMOTE CONTROL TO [REDACTED] OR WHEN [REDACTED] HANDLED THE REMOTE. HE STATES THAT [REDACTED] WOULD STIFFEN UP, LEAN TO ONE SIDE AND SOMETIMES COVER HIS HEAD. [REDACTED] FELT THAT THIS WAS DISRUPTIVE TO THE CLASSROOM AND ADDED THAT BEHAVIOR AS ONE FO [REDACTED] THAT WOULD RECEIVE A GED. [REDACTED] INDICATED THAT HE AND [REDACTED] DID NOT AGREE WITH [REDACTED], BUT THAT THE BEHAVIOR WAS ADDED. [REDACTED] INDICATED THAT HE WAS TOLD HE HAD TO FOLLOW THE BEHAVIOR PROGRAM FOR [REDACTED] AND THAT HE HAD TO GIVE HIM GEDs FOR TENSING UP AND THEN FOR BEING "OUT OF SEAT WITHOUT PERMISSION" WHEN HE WOULD GET UP AFTER THE FIRST GED. [REDACTED] INDICATED THAT HE DID NOT THINK THAT [REDACTED] UNDERSTOOD WHY HE WAS GETTING THE GEDs AND THAT HE TOLD OTHERS THIS. [REDACTED] INDICATED THA [REDACTED] GOT 30 GEDs THAT DAY AND THAT [REDACTED] HAD TO BE CONTACTED AND THAT [REDACTED] DECIDED THAT THE ADDED BEHAVIOR CONSEQUENCE WAS NOT WORKING AND IT WAS REMOVED FROM [REDACTED] PROGRAM. [REDACTED] INDICATED THAT HE DID NOT WORK WIT [REDACTED] FOR ABOUT 8-9 MONTHS AFTER THIS, BUT THAT HE OFFERED TO TAKE [REDACTED] TO THE BATHROOM WHEN [REDACTED] NEEDED TO LEAVE A SCHOOL FUNCTION AND THAT [REDACTED] SHOWED FEAR WHEN THEY GOT THERE. [REDACTED] BELIEVED THIS TO BE DUE TO [REDACTED] MEMORY OF THE PRIOR 30 SHOCK DAY. HE NOTED THA [REDACTED] IS NON-VERBAL, MALE AND [REDACTED]. HE ALSO DESCRIBED THE GED AS LEAVING BLOODY MARKS THAT SCAB OVER ON THIS STUDENT.

[REDACTED] ALSO NOTED THAT [REDACTED] HAD SWALLOWED AN EXACTO KNIFE BLADE IN THE PAST [REDACTED] HE DESCRIBED THAT AS TREATMENT FOR THIS, [REDACTED] WAS IN RESTRAINTS ALL DAY AT THE FACILITY AND THAT PERIODICALLY STAFF WOULD RUN AT HIM WITH A PLASTIC KNIFE, ASK HIM IF HE WANTED TO SWALLOW A KNIFE AND THEN GIVE HIM A GED. [REDACTED] INDICATED THAT [REDACTED] RESPONSE WAS A LOUD SCREAM.

**ALLEGATION**

ON WED 8/29 REPORTER RECEIVED A CALL FROM JRI FAMILY NETWORK- [REDACTED] THEY ARE CONTRACTED AGENCY THROUGH DSS. SHE ASKED IF SHE HAD BEEN CONTACTED BY JRC. SHE PROCEEDED TO EXPLAIN TO REPORTER WHAT HAD HAPPENED.

ON SUNDAY 8/26 AT ABOUT 2 AM A STAFF IN ALV'S HOUSE- STOUGHTON HOUSE RECEIVED A CALL FROM ANOTHER ALLEGED STAFF MEMBER. THE STAFF ON PHONE REPORTED TO STAFF AT HOUSE THAT ALV HAD DISPLAYED INAPPROPRIATE BEHAVIORS DURING THE DAY. THE STAFF STATED THAT THEY VIEWED CAMERA FOOTAGE TO SUPPORT THE ALLEGATION OF ALV'S INAPPROPRIATE BEHAVIORS. STAFF ON PHONE INFORMED STAFF AT HOUSE THAT ALV DEMONSTRATED BEHAVIORS TO RECEIVE GED ( ELECTRIC SHOCKS) TREATMENTS. STAFF AT STOUGHTON HOUSE PROCEEDED TO GIVE ALV 77 GED APPLICATION IN A 3 HOUR PERIOD. THIS STAFF DID THIS BECAUSE OF THE STAFF WHO HAD CALLED.

[REDACTED] REPORTED THAT ALV WAS EXAMINED MEDICALLY ON MONDAY 8/27 AND INDICATED THAT HE WAS OK. REPORTER DOES NOT KNOW OF ANY VISIBLE MARKS- SINCE IT WAS NOT REPORTED TO HER.

[REDACTED] REPORTED THAT STAFF WHO TELEPHONE THE STAFF AT THE HOUSE WAS NOT IN FACT AN EMPLOYEE, BUT ANOTHER CLIENT WHO WAS ON THE RUN IN NEW YORK.

## ALLEGATION SUMMARY

THE REPORTER STATES THAT THE ALV WAS TRYING TO GET THE ATTENTION OF A STAFF IN THE CLASSROOM SETTING. THE ALV WAS SHOCKED, ACCORDING TO THE REPORTER, WITHOUT A JUSTIFIED REASON. THE REPORTER FEELS THAT THE STAFF WAS ANNOYED WITH THE ALV, AS OPPOSED TO THE ALV ENGAGING IN A BEHAVIOR THAT WARRANTED A GED (SHOCK).

**ALLEGATION**

[REDACTED] THE REPORTER WAS AT THE FACILITY ON 10/29/07 FOR [REDACTED] THE REPORTER DIDN'T KNOW THE IDENTITY OF THE ALV UNTIL 11/07.

THE REPORTER WAS OBSERVING [REDACTED] FOR APPROX 1-2 HOURS IN THE CLASS SETTING. THE REPORTER SAW THAT THE ALV WAS ADMINISTERED SOME SHOCK TREATMENT, FOR TURNING AROUND IN HIS CHAIR.

THE ALV WAS RAISING HIS HAND FOR 25 - 30 MIN, TRYING TO GET THE ATTENTION OF A STAFF PERSON. THE ALV WAS TOLD TO KEEP QUIET AND WAS IGNORED AND TOLD NOT TO SPEAK OUT UNTIL HE WAS SPOKEN TO. THE REPORTER DIDN'T KNOW WHY THE ALV WAS TRYING TO GET THE ATTENTION OF THE STAFF FOR, UNTIL AFTER THE ALV WAS SHOCKED.

AFTER THE ALV TRIED TO GET THE ATTENTION OF [REDACTED], AND THE ALV APPEARED ANNOYED. THE STAFF ADMINISTERED A GED. AFTER THAT THE ALV SAID OUT LOUD THAT "I DIDN'T GET UP OUT OF MY SET", "I JUST TURNED AROUND". THE ALV SAID HIMSELF THAT HE WANTED TO FILE A "HUMAN RIGHT COMPLAINT, AND WAS TAKEN FROM THE CLASSROOM.

ACCORDING TO THE REPORTER, THE ALV CLAIMED HE SAW ANOTHER STUDENT THAT WAS STEALING FOOD FROM A CABINET. THE ALV WAS TOLD THAT IF HE SEES SOMETHING LIKE THAT HAPPENING, HE WAS TO GET THE ATTENTION OF A STAFF MEMBER AND ALERT THEM AS TO WHAT WAS HAPPENING.

THE REPORTER FEELS THAT THE INCIDENT THAT SHE OBSERVED WAS NOT WITHIN A TREATMENT PLAN, AND WAS NOT WARRANTED DESPITE THE COURT ORDERS FOR A GED. THE REPORTER FEELS THAT [REDACTED] WAS ANNOYED WITH THE ALV, AS OPPOSED TO THE ALV ENGAGING IN A BEHAVIOR THAT WARRANTED A GED (SHOCK).

[REDACTED] STARTED LOOKING INTO THIS SOMETIME IN NOV. OF 2007. HE CAN BE REACHED AT THE SAME # AS [REDACTED]

2/20/08 t/c to [REDACTED] and [REDACTED] According to [REDACTED] the AL V's plan in October contained a GED consequence for "out of seat without permission," under HDB1, but the consequence for inappropriate sitting would have been a pinpoint with "no."

2/20/08 - SCREENED IN FOR 19C INVESTIGATION.

TPR. LISA WASHINGTON-BROWN REVIEWED THIS CASE ON 06/10/08 AND SUGGESTS DMH CONDUCT AN ADMINISTRATIVE/MISTREATMENT REVIEW.

**ALLEGATION**

THEY ARE MANAGING BEHAVIORS IN A OVERLY CAUTIOUS WAY- ALV IS BEING PUNISHED SEVERELY FOR THINGS THAT ARE NOT DANGEROUS.

THEY ARE USING PUNISHMENT ON THE ALV THAT ARE USED FOR INDIVIDUALS WHO ARE AGGRESSIVE OR ENGAGED IN SIB.

ALV FEELS THIS IS EMOTIONALLY ABUSIVE.

THERE IS CLASSROOM WHERE THEY PUT STUDENTS WHO HAVE AGGRESSIVE BEHAVIORS- THEY ARE VERY RESTRICTED AND SIT IN A CUBICLE ALL DAY AND DO CLASS WORK.

IT IS DEPRESSING BEING IN THIS ROOM. THERE IS NO SOCIAL INTERACTION. IT IS LIKE SITTING IN A CELL.

ALV IS LEFT THERE FOR EXTENDED TIME. SHE IS NOT PUT IN CLASSROOM WITH OTHER PEOPLE.

IT IS VERY HARSH BEING ALL BY HERSELF WITH NO ONE TO TALK TO. AT HER RESIDENCE SHE CANNOT SPEAK WITH ANYONE- HAS TO STAY IN HER ROOM.

ALV DOES NOT DO THINGS THAT BAD TO BE PLACED IN THIS TYPE OF SETTING.

THEY JUST PUT THE ALV IN THIS SETTING TODAY. SHE AN [REDACTED] WERE MESSING AROUND AND THEY GOT CAUGHT.

ALV WAS THERE BEFORE FOR A MONTH FOR WRITING AN INAPPROPRIATE STORY. WHEN SHE GOT OUT - SHE GOT I TROUBLE AGAIN AND NOW SHE IS GOING TO BE THERE AGAIN.

THIS HAS MADE THE ALV MUCH MORE ANXIOUS. ALV FEELS SHE IS TREATED WORSE THAN THE OTHER STUDENTS. SHE GOT IN TROUBLE WITH ANOTHER STUDENT AND THAT STUDENT WAS IN TROUBLE FOR ONLY ONE DAY WHILE SHE IS BEING PLACED IN THE ISOLATED SETTING AND WILL BE THERE FOR A WHILE.

ALV IS SCARE IF HER TREATMENT TEAMS FINDS OUT [REDACTED] THEY MAY FIND SOMETHING TO JUSTIFIED THE RESTRICTIONS.

ALV IS AFRAID OF WHAT ELSE THEY MIGHT DO. ALV WISHES SOMETHING CAN BE DONE QUICKLY.

ALV HAS BEEN AT JUDGE ROTTENBERG SINCE FEBRUARY OF 2006.

ALV PREFERS IF SOMEONE VISITS AND SPEAKS TO HER DIRECTLY.

[REDACTED] )  
6/10/2008- SCREENED OUT - THERE IS NO INDICATION THAT ALV SUSTAINED AS SERIOUS INJURY AS DEFINED BY M.G.L CHAPTER 19C AND DPPC REGULATIONS 118 CMR.

HOWEVER, AND ADMINISTRATIVE REVIEW IS RECOMMENDED.

[REDACTED]. [REDACTED] WAS CALLED BY THE ALV ON 6/10/08. THE ALV FEELS THAT HE IS RECEIVING GED PROCEDURES / SKIN SHOCK, FOR BEHAVIORS THAT DO NOT FALL WITHIN THE CORRECT CATEGORY OR THE ALV'S BEHAVIOR PLAN.

HOWEVER THE REPORTER DOESN'T HAVE ANY INFO AS TO WHAT THOSE BEHAVIORS ALLEGEDLY WERE.

THE REPORTER ALSO ADDS THAT THE ALV HAS BEEN CALLING FOR [REDACTED] BECAUSE HE CANNOT BREATHE(UNKNOWN WHY), AND THAT [REDACTED] IS TAKING TOO LONG TO COME TO THE CLASSROOM TO CHECK ON THE ALV.

THE REPORTER ADDS THAT THE GED MADE THE ALV MAD BUT THAT HE DID NOT RECEIVE ANY INJURIES AS A RESULT OF THE GED.

[REDACTED]

6/10/08 - SCREENED OUT. NO REPORTED INJURY TO THE ALV AS A RESULT OF ABUSE BY A CARETAKER. ALSO SENT TO DMR, F.Y.I.

**Allegation To Be Investigated:**

The ALV states that over a 7 years period the ALV was shocked over and over for things she shouldn't have, and the device actually burned into the skin on her stomach. The ALV was never allowed to call anyone about this, other than to speak to [REDACTED] at J.R.C. The ALV was playing in a gym and injured herself. The ALV was in extreme pain and asked for medical care and she was denied. The ALV 3 weeks later was at [REDACTED] residence in N. Andover, and was evaluated [REDACTED]. The ALV needed [REDACTED] because the injury was not treated in time, by the ALAB's. The ALV has suffered nightmares during sleep, jumps all the time, if she hears velcro peeled back. The ALV is angry and disturbed about what happened and doesn't think" right from day to day. She had [REDACTED] from what happened, and is just able to talk about her ordeal now.

Does the Other Individual still have access to the Alleged Victim?

**Relevant Information**

Briefly explain the incident:

**The incident happened a few times, from 2002 - 2009. The ALV states that over a 7 years period the ALV was shocked over and over for things she shouldn't have, and the device actually burned into the skin on her stomach. The ALV was never allowed to call anyone about this, other than to speak to [REDACTED] at J.R.C. The ALV was playing in a gym and injured herself. The ALV was in extreme pain and asked for medical care and she was denied. The ALV 3 weeks later was at [REDACTED] residence in N. Andover, and was evaluated [REDACTED]. The ALV needed [REDACTED], because the injury was not treated in time, by the ALAB's. The reporter adds that none of this was allowed to be reported until the ALV left in 2009, and she was so traumatized for years, she couldn't talk about it.**

If the incident is sexual in nature, were police notified and did the victim receive medical treatment?

**Nothing sexual in nature.**

Describe any physical injuries in detail: (i.e. shape, size, location, color)

**The ALV was burned by the elec shock device used on her stomach and on 1 leg, on the back of her calf. The ALV has scars from the burns. The ALV also needs [REDACTED], that shouldn't have, because of the delay in treatment.**

Was the alleged victim injured emotionally? Explain how this emotional injury affected the alleged victim's ability to function?

**The ALV was shocked for things that weren't on her plan, and was taken to rooms where the camera's were out of view. Sometimes, shocks were administered outside the building. The ALV was shocked 5 X for bumping into a shower door several times.**

Is the Alleged Abuser responsible for the alleged victim's injuries? Explain:

**The ALV was also shocked in her sleep and shocked against the guidelines of the facility and the treatment / behavior plan. The ALV has suffered nightmares during sleep, jumps all the time, if she hears velcro peeled back. The ALV is angry and disturbed about what happened and doesn't think" right from day to day. She had [REDACTED] from what happened, and is just able to talk about her ordeal now.**

Is there something the alleged victim's caretaker should or could have done to prevent the injury or incident from occurring? Explain:

**Followed the proper guidelines and not tortured her the way they did, and also should have allowed her to call someone about how she was being treated.**

## I Wonder if Parents Really Know What Happens to their Children at Judge Rotenberg Center

April 17, 2006

- 1. Do parents, judges, and state authorities know that a non-verbal student with autism gets shocked for closing his eyes for more than five (5) seconds while sitting at his desk?** This is classified either as a major-disruption or non-compliance, which are major behaviors. Staff must follow JRC rules and shock the student the same as if he screamed at the top of his lungs to intentionally disrupt class, or refused to follow directions. The excuse of the need to reduce major behaviors is used to justify shocking students for other behaviors. Do parents and authorities know this before signing permission papers for their child to be shocked?
- 2. Do parents, judges, and state authorities know that some students get shocked for standing up from their seat, raising their hand, and politely asking, "I would like to go to the bathroom, please?"** This is called Aggression on most students' programs. Staff must follow JRC rules and shock the students the same as if they stood up "out of seat without permission" to attack a staff! The excuse of the need to reduce major behaviors is used to justify shocking students for other behaviors. Do parents and authorities know this before signing permission papers for their child to be shocked?
- 3. Do parents, judges, and state authorities know that some students get shocked for going to the bathroom in their pants – even if they have been asking for the bathroom for nearly two (2) hours?** This is called a health-dangerous-behavior (HDB) on most students' programs with autism (called "lower functioning students") and with some high-functioning students too. Staff must follow JRC rules and shock the student the same as if he/she went to the bathroom in their pants five (5) minutes after their previous trip to the bathroom. The excuse of the need to reduce major behaviors is used to justify shocking students for other behaviors. Do parents and authorities know this before signing permission papers for their child to be shocked?
- 4. Do parents, judges, and state authorities know that some students get shocked for asking to go to the bathroom more than five (5) times in an hour?** Asking to go to the bathroom more than once in an hour for some students is called "nagging," a minor verbal behavior, and some students are shocked for five minor verbal behaviors in an hour. Staff must follow JRC rules and shock the student with an electric shock for asking to go to the bathroom five times, the same as if the student was inappropriately talking out five times. The excuse of the need to reduce major behaviors is used to justify shocking students for other behaviors. Do parents and authorities know this before signing permission papers for their child to be shocked?
- 5. Do parents, judges, and state authorities know that some students get shocked for gently and thoughtlessly tearing into a paper cup while sitting on the sofa watching television?** Staff simply could take the paper cup away from the student and throw it away if they wouldn't get in trouble for it. Staff must follow JRC rules and shock the student with an electric shock the same as if the student was ripping décor off the walls or ripping furniture. The excuse of the need to reduce major behaviors is used to justify shocking students for other behaviors. Do parents and authorities know this before signing permission papers for their child to be shocked?

**CONFIDENTIAL**

6. **Do parents, judges, and state authorities know that some students get shocked for yelling when they think they are about to get an electrical shock?** Sometimes the staff is reaching for the remote control to shock a different student, then must shock two students because of the yell in anticipation and fear of a surprise shock. Yelling in this context is called a "major disruption" for most students even though the real major disruption is that someone is about to get shocked. Staff must follow JRC rules and shock the student with an electric shock for yelling the same as if the student was yelling loudly across the room to purposefully distract the classroom. The excuse of the need to reduce major behaviors is used to justify shocking students for other behaviors. Do parents and authorities know this before signing permission papers for their child to be shocked?
7. **Do parents, judges, and state authorities know that some students get shocked for instinctively trying to remove the electrode while the electrode is shocking and burning through their skin for two (2) seconds?** Most Americans don't know this type of pain, which is severe and can leave burn marks and even bloody scabs all over a child's body; it is not a "bee-sting!" Trying to rip the source of pain off of an arm, for example, is a normal bodily reaction. Students are expected to forcefully suppress their own normal bodily reaction to fear, or else! Staff must follow JRC rules and shock the student with a second electric shock the same as if the student was trying to remove the electric devices while hiding under their bed covers. The excuse of the need to reduce major behaviors is used to justify shocking students for other behaviors. Do parents and authorities know this before signing permission papers for their child to be shocked?
8. **Do parents, judges, and state authorities know that a student with autism gets shocked at JRC for blowing bubbles out of his lips with his saliva and sucking it back in, never touching it with his hands?** This is called "health-dangerous" so they can shock him for it. Sticking a pacifier or something else to suck on into the student's mouth, or giving a sip of water, or giving him real bubbles and a break when appropriate, or a wide variety of other methods could be used to help this child to stop unsociable behaviors instead of shocking the student. Staff must follow JRC programs and shock the student the same as if the student had spit onto the table and sucked it back into his mouth, which WOULD be health-dangerous if you are worried about dying from germs and IF it was the student's behavior! The excuse of the need to reduce major behaviors is used to justify shocking students for other behaviors. Do parents and authorities know this before signing permission papers for their child to be shocked?
9. **Do parents, judges, and state authorities know that students can get shocked for behaviors such as pulling an arm up into a shirt sleeve and holding the inside of the sleeve? Or for wrapping a wrist once around a backpack strap while walking?** This is called "health-dangerous." Staff must follow JRC rules and shock the students the same as if students were trying to kill themselves. The excuse of the need to reduce major behaviors is used to justify shocking students for other behaviors. Do parents and authorities know this before signing permission papers for their child to be shocked?

Staff are suspended or fired for refusing to follow student programs. Staff are not allowed to create any other alternatives.

## HOW LOW CAN WE GO AT JUDGE ROTENBERG CENTER?

### Questions to My Former Colleagues

(4/10/06)

1. **Have you ever given students like [REDACTED] (autistic, non-verbal, Room 4) an electric shock for his behavior of "closing eyes while at [REDACTED] desk) for more than five seconds," listened to his loud cry, seen his tears, and wondered if there is a God and if God is watching? DON'T DOUBT YOUR FEELINGS!**
2. **Have you found yourself wondering whether it is morally ethical follow [REDACTED] program (autistic, Workshop1) and give him an electric shock with the GED-4 (the strongest of shock devices) just because he stands up, takes a step, raises his hand, and says, "Excuse me, I'd like to go to the bathroom, please?" DON'T DOUBT YOUR FEELINGS!**
3. **Have you seen [REDACTED] (autistic, non-verbal, Room 4) with burn scabs all over his torso, legs, and arms, some of which were bleeding, caused by the GED-4 electrodes (the strongest of shock devices)? I am aware of three different times when the Nursing department took [REDACTED] off of electrode devices for several weeks to let his skin heal back up before putting him back on electrodes BECAUSE THEY HAD NO OTHER PLACES ON [REDACTED] BODY LEFT TO BURN! Now psychologists can truly credit themselves for reducing [REDACTED] "Bang head" behaviors. How? [REDACTED] behaviors dropped significantly when they took the electric shocks for "Bang head" that they had prescribed back off of his treatment program! Have you asked yourself whether such "treatments" are really necessary? Have you had the question in the back of your mind wondering how much YOU can truly TRUST [REDACTED] and his psychologists to know what is best for these students who you love in the long term? DON'T DOUBT YOUR FEELINGS!**
4. **Have you felt sick and questioned whether you should immediately resign after witnessing your fellow staff run up to [REDACTED] (Workshop1), while he is appropriately working on his task, and forcefully attempt to shove a plastic knife down [REDACTED] throat? The staff yells with an angry and red face, "Do you want to swallow a knife? Do you want to swallow a knife?" While [REDACTED] is yelling and screaming in fear for his life, and is trying to push the knife out of his face, someone hidden off to the side gives him an electric shock! [REDACTED] screams and cries out in fear and pain! They used to repeat this several times per week, always when [REDACTED] least expected it coming. This is unquestionably torture, it is inhumane, and it is morally WRONG WRONG WRONG to do to anybody whether you believe in God or not! This is the very best "treatment" that [REDACTED] and his psychologists can think of to help [REDACTED] not to be suicidal! Court approved! Family approved! [REDACTED] is allowed NO counseling, and his suicidal tendencies are not reversed after nearly 20 years of it! They were doing this to [REDACTED] two years ago, they did this to him periodically for years before that, and they will do this again to [REDACTED] in the future in their very best efforts to train [REDACTED] not to hurt himself! Have you asked yourself if you are truly at JRC to help students as you stand off to the side and do nothing to protect [REDACTED] and students like him? DON'T DOUBT YOUR FEELINGS!**
5. **Have you participated in or witnessed students receiving five (5) electric shocks for a behavior, spread out over a 10-minute period of time, with someone standing outside of the door with a silent timer and the remote control? That is so that the student anticipates another shock coming soon, but doesn't know how long until the next... zzzzz, so that it plays with their minds and sanity! That's torture! We don't allow torture of our enemies in the United States, so the U.S. sends our enemies elsewhere to be tortured. So did the New York legal system! Roughly ¼ of JRC students are from New York where electric shock is not allowed. Have you ever questioned if you really want to be a part of it? DON'T DOUBT YOUR FEELINGS!**

6. **Are you aware of JRC's past history of pinching the students you love, slapping them, and putting instruments with flashing lights over their heads so that they can't see and panic and think that they are dying?** Are you aware of JRC's past history of breaking ammonia smelling salts in student noses so that they think that they are suffocating? Are you aware of a JRC student dying while strapped up to the restraint board in the past? Of another dying after multiple repeated shocks? It has happened! Do you think that the same JRC philosophy towards students still drives their "treatments" today? **DON'T DOUBT YOUR FEELINGS!**
7. **Have you wondered if making approximately 40 students in one large room count and wrap 12 popsicle sticks into bundles with rubber bands as a task for over six hours per day, seven days per week, for years and years, in walls without windows, might contribute to their behaviors?** Have you ever asked yourself whether better conditions could lower their behaviors without giving them electric shocks? Have you ever paused before pressing the button to give yourself a short reality check? **DON'T DOUBT YOUR FEELINGS!**
8. **Have you ever thought of yourself and students who you love as being subjects in a "scientific" laboratory experiment and wondered where does it lead to?** Where will our world go with this data? Am I just a number? Do my students feel the same way? Do my students need a purpose? Does anybody care? **DON'T DOUBT YOUR FEELINGS!**
9. **Have you ever seen a student get up towards the "30" shocks-in-a-day cutoff number, and asked yourself if the treatment REALLY works for that student's behavior?** Have you wondered if something else works better than the punishments and rewards paradigm? **DON'T DOUBT YOUR FEELINGS!**
10. **Have you seen charts and actual improvements in student behaviors that help to convince you that you are actually helping these students?** Don't let the charts fool you! Have you wondered why students have plans where staff must pinpoint behaviors 20 - 50 - 300 times per hour such as, "No talking out!" knowing full well that the pinpoints are accelerating behaviors and leading to aggression and restraints? Have you followed the "treatment" plan until they attacked you, then wondered if the whole restraint and strapping them to a plastic four-point board similar to a cross was really necessary? Have you thought of steps other than pinpoints and physical prompting that you are not permitted to try to de-escalate the situation and to help students to save their face? The more pinpoints, the more students have a need to prove that they are in control of their lives, and their self-determination to prove this to themselves causes them to have behaviors. In their first months at JRC, the more times students attack, yell, swear, or are restrained in response to the pinpoints, the better the charts look once the court approves electric shocks as "treatment"! Are these impressive looking charts actually giving a short-sighted picture that is necessary to gain court-approvals and support for shocking students? **DON'T DOUBT YOUR FEELINGS!**
11. **Have you seen other schools for students with autism who handle severe behaviors more effectively than JRC does, but without the use of electric shocks or restraints?** I have! Not only are their behaviors handled more effectively, I have seen for myself students with autism who started school with severe behaviors achieving the most REMARKABLE accomplishments with pottery, painting, music, gymnastics, as well as hands-on math, without the painful shocks! They use real hands-on materials, and don't depend on touch-screen computers with pictures of circles and squares to teach students. I feel misled by JRC psychologists to believe that shocking these students who I love is the ONLY way to help them! Have you wondered if you are also being misled at JRC? **DON'T DOUBT YOUR FEELINGS!**

[REDACTED]

March 29, 2006

[REDACTED]

Judge Rotenberg Center  
240 Turnpike Street  
Canton, MA 02021

[REDACTED]

I have worked for your organization, Judge Rotenberg Center, for the past three years and two months. Most staff at JRC know me, and people who know me know that I like helping people in every way that I can. My sister died of Cystic Fibrosis when she was ten years old, and I know what it is like for family to travel around the country trying to get the best and most promising care available for their child. I think parents have been supportive of JRC because it offers hope where there seems to be no hope, and the charts look promising.

I know how good it feels inside to be able to help somehow and to see the students in my care respond to my small efforts. I frequently took only 5 – 10 minute breaks because I preferred spending my time helping the students. It is that desire to make a positive difference that has motivated me to remain at JRC for three years. I've been stuck in this terrible predicament of having to choose between staying at JRC to help students in the small ways that I can help, or to leave JRC because the overall philosophy of treatment feels very wrong and lacking.

I resigned [REDACTED]. When I first started working at JRC, I felt bad about students getting the electric shocks. I started to get nightmares of students screaming in pain when they received the electric shock, and of screams echoing down the halls. In the mornings I would justify to myself that it was necessary to give students the shocks, like receiving spankings as a child myself, because their behaviors were so severe. Students were in pitiful conditions when they arrived from other institutions that rejected them, and I could see in charts and in person that their behaviors drastically changed for the better while on the electric devices. But no matter how I justified working at JRC, the nightmares continued to get worse. Then I had what seemed to be a minor back injury that would not heal. After seven weeks without work, [REDACTED] was very kind and gracious to find work that I could do for JRC typing transcripts for the health videos. My pain in my back still did not go away for another seven weeks, and was still weak when I returned to the classroom.

Soon after, I was moved out of JRC main campus to work in the residences during the day with students on house restrictions. I developed stomach pains and nausea that was worse at night, and the nightmares kept me up five hours per night with the screams of students who I love – even though I was removed from students on devices. I still justified to myself daily that JRC was doing a great thing by helping these students in a big way.

Then I witnessed an incident of a student getting electric shock in Workshop – for standing up and taking two steps while raising his hand and saying, "Excuse me, please. I need to go to the bathroom please!" I was sick for three nights. My doctor said that I was getting an ulcer, that my cholesterol had shot up dangerously high (even though I have strictly followed the RAVE vegan diet, without exceptions), and advised me to leave JRC. Now [REDACTED] after leaving JRC, I feel MUCH healthier, my stomach is no longer bothering me, and I am sleeping soundly at night. The time away

from JRC has helped me to clear my head. I would like to inform you that I can no longer look at JRC's treatment programs in positive light, and that there are other options that you can use for JRC that will work much better. Until changes are made, I am now in opposition to the methods used at JRC. The suggestions that I am making I believe can save JRC.

I had the opportunity to observe a different school near JRC that serves students with autism. I witnessed students exhibiting some major behaviors, including a student slapping a teacher in the face and becoming aggressive, that were de-escalated and addressed without electric shocks or restraints. The teacher was able to regain control of the situation and the student demonstrated that he was again following her directions before students moved onto their next activity. Students at that school exercise for one to three hours per day to get their endorphins moving, which works better than drug medications. There was a wide variety of hands-on academics for these students with autism, but the emphasis was all about demonstrating to students their own ability to learn and to produce quality art, music (they have a brass band of students with autism!), as well as regular academic objectives. They get GREAT results in controlling behaviors, but through a very different approach -- one of nurturing the person inside each student, and never "treating" a student through pain. I saw that it is NOT necessary to hurt students to help them!

[REDACTED] at JRC working with students with autism and mental retardation, I have something important to say -- an educated opinion. **I firmly now believe that ALL of the behaviors of students with autism at JRC can be addressed even more effectively WITHOUT painful shocks! And with only a fraction of the restraints used at JRC! It CAN be done with the right approach and paradigm!** I will give a few examples.

After I piloted the Lanyards System behavioral experiment for you in Workshop, as well as the other experiments before the Lanyard System, [REDACTED] showed me the outstanding results. Behaviors had dropped to almost nothing with the eight students in the pilot studies. Then one year later, an email was sent out saying that JRC was going to discontinue the Lanyard System school wide. Fourteen (14) students were listed in the email as examples of the types of students who were non-responsive to the Lanyards reward system. All eight (8) students in the original pilot study with me were included in the list of fourteen (14) students who were given as example of the Lanyard System NOT working months after I left Workshop! **Why were all eight students successful in the pilot study with me listed among the fourteen most unresponsive to the Lanyard System? The answer is very profound and telling, and I believe that the answer can save your school! It was NOT the punishments and rewards system that got the results!** What worked was that I took time to observe each and every student's progress with their task, and to acknowledge to them in my AC's what they were doing correctly! It doesn't matter if you give students real pennies, or plastic tokens, or cloth Lanyards around the neck! Look how many students you have who are NOT getting many Supergoodies anymore now that students are on Tokens again. These students are just as happy to get the pieces of cheap plastic as real food!

What matters is the acknowledgements that I was giving, not for superficial "Good doing your task," which is typical. I actually LOOKED at what they needed help on and showed them HOW to do their tasks correctly, how to sit correctly, then immediately acknowledged them for doing so correctly before they changed to their old habits. Each time I acknowledged their successes for their own specific academic/behavioral goals that I set for them, I was reinforcing in their memory what the objective was, that they COULD accomplish the objective, that I was NOTICING them accomplishing the objectives, and that I was CONSISTENT! I set the "variable" timer to two (2) minutes when one or more students were having flurries of behaviors, then gave all of the OTHER students the attention who were trying to learn without behaviors! Then I would work the timer back up to every five (5) minutes once all students were behaving to remind myself to give acknowledgements and

Supergoodies consistently. **What worked overall, and exactly what these students were needing, was for someone to actually care about them and their progress in their ability to do meaningful tasks, and to do these tasks well. To be genuinely NOTICED and admired!** Any program will ONLY work if it reminds staff to NOTICE and to LOVE these students sincerely!

Why do you think [redacted] now blows up like he does? How long could you sit counting and wrapping popsicle sticks with rubber bands for eight hours a day, seven days a week, for years and years and years! So he is now on the special chair to shock him when his frustration finally bursts out and he stands up and throws his table!

After the Lanyard System pilot studies, I was asked to teach eight (8) students how to do the popsicle task who had not yet learned how to do the task correctly after years of doing the task incorrectly hour after hour, day after day. I was told repeatedly by three supervisors that these students could NOT learn! I broke the task into gradient steps, and taught the eight students in just three and a half (3 ½) weeks to do the task correctly! I broke the task into gradient steps, starting with the final steps and adding over time the previous steps so that they were always ending with a final product. [redacted] did 52 CORRECT bundles in one and a half (1 ½) hours of time, whereas before he would attempt 1 - 2 bundles per day, always incorrectly. I was told by a supervisor that I should NOT TRY to teach [redacted] that he was "retarded" and couldn't learn, and this was said in front of [redacted] [redacted] curled up in response! Staff (plural) who said that [redacted] and the others "couldn't" learn the task were very upset by the rapid success, as well as by my being named "Staff of the Month" for my efforts with the Lanyard System. They teamed together, and student academics were unfortunately not at the top of priorities. I was moved out. I was told point blank by one of your top administrators that focusing on academics has not been effective in reducing student behaviors at JRC!

The point that I want to make about the experience of teaching these eight students how to do the same vocational task as the other students in Workshop is that **the behaviors DID DROP significantly for this group of students too while I worked with them, just as they had dropped for the students on the Lanyard System pilot study! The whole concept of punishments and rewards is a misunderstanding of human nature itself** because it loses the element of human connection! It is through demonstrating to each student their capabilities and through acknowledging them as a respectable human being that they make the greatest responses! And NO, I am not suggesting that students with severe behaviors just need academics and acknowledgements. I am saying that these are important elements in a whole picture that could be very powerful and effective treatment plans for students at JRC - without the use of pain!

The power of connecting with students and respecting them applies to higher functioning students as well. [redacted] for example. He put a number of staff at JRC into the hospital with very serious life-threatening injuries, and required 2-1 staffing. After working for months at school on the computer to learn his multiplication facts, he did not know them because he had not been applying himself and didn't want to see himself fail. The aims were set very low on the computer for [redacted] and many other students to pass to the next level, like 25 correct answers per minute. [redacted] learned all levels with me in one and a half (1 ½) weeks (excluding the 4-week home visit in the middle), and I set an aim of 65 correct answers per minute! When I showed [redacted] progress on a chart to the appropriate individuals in the Education Department, I was told to discontinue the work, that the Math facts sheets that I had made for them were "unapproved curriculum." Then I was given the data off the computers at my request, the data that YOU created for students to learn their math facts in graduated levels. I used Microsoft Excel to scramble the data into beautiful forms. I was told that this too was "unapproved curriculum" - YOUR data off the computers, fifty large-print questions per page, was not approved curriculum! I was given no further explanation! I later found a tricky way around the problem by making up sheets using something that had already been approved, Math

Workshop Factory. I was able to help many students to drop their behaviors while at the residence on house restrictions by helping them to see themselves succeeding in something that was concrete and on a gradient scale – your math levels. Students literally begged to work on their Math facts! No threats or rewards were necessary!

I would like to give one more example to show that other options are available to help students instead of the use of punishments and rewards. In my youth, my brilliantly-minded best friend named [REDACTED] was having much difficulty with his rigid German mother. His mother grew up as a child with a harsh Nazi soldier for a father. The authoritarian approach was not working with [REDACTED] was restrained repeatedly by his father when [REDACTED] would become dangerous, but [REDACTED] was getting too big for that! When [REDACTED] became too frustrated, his family would have to escape in their car for their lives! One time [REDACTED] even blew up the large microwave in the house with a bomb he constructed from household materials, leaving melted and twisted metal for a microwave (used later by the Fire Department for education purposes), and large pieces of glass stuck one half ( ½ ) inch perpendicularly into oak wood cupboards across the large kitchen from the microwave. **Instead of putting [REDACTED] into a group home, his mother took [REDACTED] to a chiropractor, a foot-reflexologist, an allergist, got him off trigger foods in his diet, got him exercising on a daily basis, took daily interest in his academics as needed, and started him into regular music lessons. She drove him long miles for these services. It took only two weeks for [REDACTED] life to change to where even [REDACTED] acknowledged that he was a new person!** His mother was still overbearing, but the connection that they made through her efforts even changed her heart too. Now [REDACTED] is making 7-digit figures for major advertising companies for a living, putting his brilliant mind to good use. He is quite the family man now.

**The point that I am making is that there ARE alternatives to pain from electric shock!** Taking great effort to CARE for these students and to connect with them – physically, through body contact and acu-pressure (well documented to reduce emotional charge), through exercise, through challenging them with the arts, through finding what students are interested in academically and fostering those interests and directing them towards careers, and breaking academic tasks down into achievable steps and having someone to observe and follow through with acknowledging their progress, these are all effective alternatives to punishments and rewards! Disrespect starts with the basic pinpoint, such as, [REDACTED] there is no stopping work!” Before going onto electric devices, [REDACTED] might plot to slash your face in return for the pinpoint. [REDACTED] does much better at controlling his reactions now that he gets an electric shock for it, and [REDACTED] will tell you that the electric shock is much better than being stuck at the residence on house restrictions. But why instigate students to have so many crises and restraints in the first place? There are many ways to interest students in learning and improving their lives. My friend [REDACTED] would have quickly gone into electric devices if he had been placed at JRC and had felt insulted by the pinpoints. [REDACTED] did not understand why he was acting that way back then, nor do these students understand their actions.

I am giving you a video and two books by [REDACTED] a homeopathic doctor who lives in Amherst, MA, who happens to be the world's top specialist in homeopathy for pediatrics. [REDACTED] has helped literally thousands of children and youth with major behavior disabilities, as well as students with autism using all-natural and completely safe and drug-free approaches. Homeopathy can effectively reduce charged frustrations and the individual ways that students express their frustrations, called “symptoms.” Each client must be studied to determine their reactive state, then a homeopathic remedy is selected from 5000+ remedies. The homeopathic remedy acts like an immunization shot to the total reactive state that the student is in – including mental, emotional, and physical symptoms of reactivity. Homeopathy has existed as a natural approach to medicine for over 300 years, and has had a great comeback as an alternative to anti-biotics and other medicinal drugs. It works with the body, not against the body. A person can swallow bottles of a homeopathic remedy without getting

sick. I have personally observed MANY children make remarkable changes in their physical, emotional, and mental symptoms, including meeting children who used to have symptoms of autism. [REDACTED] is world-known for his many successes with autism and behavior disabilities, and a search on the internet will reveal this. His book [REDACTED] demonstrates the complex study of one single remedy and what a student looks like who is having severe behavioral symptoms and is needing that remedy. The book *Proving's* gives the best description of how homeopathic remedies are made and what classical homeopathy is all about.

[REDACTED] is also a great homeopath in case you would like to try drug-free homeopathy at JRC. Their phone numbers are [REDACTED]

[REDACTED] has clear-cut symptoms with his tumors and his aggravation of self-destructive stimulation when the weather gets hot. [REDACTED] would respond very clearly both physically and behaviorally, and would no longer need electric shocks. [REDACTED] behaviors and terminal illness come from his internal reactive state. [REDACTED] with his ups and downs and his heavy suicidal tendencies has clear-cut symptoms and would make great progress with the right homeopathic remedy. [REDACTED] would also respond predictably over half a year of time. All students at JRC would respond quite well to homeopathy if combined with a well-rounded supportive learning atmosphere.

I would like to ask you to please re-think the philosophy on which you manage both students and staff at JRC. **Please cease the use of electric shock on students because there are better options that help without hurting or humiliating students** at a time when students are already feeling low and insecure in this world. The punishment and rewards model neglects to help each student to find their unique strengths and talents or to use their strong points to take control of their own lives. The success stories at JRC are very real, but only because some of the students choose to learn in spite of the electric shocks, not because of the electric shocks. There are better ways to get to the same place without causing pain and degradation! It is simply morally wrong to continue your program under its current paradigm. Please stop! Get help from top experts elsewhere to help convert your school into a model school that shows what can be done when you validate the lives of these students without coercion, power games, pain, or suffering!

Sincerely,  
[REDACTED]
